

# NORTHEAST REGIONAL SCHOOL of Biotechnology and Agriscience

## EARLY COLLEGE HIGH SCHOOL

On the Campus of the Vernon G. James Research  
and Extension Center, Washington County

Opened in  
August 2012  
to incoming  
ninth graders

### Focusing on STEM: Science | Technology | Engineering | Math

Engineering is a central feature of the curriculum and students will benefit from the work of the NC State researchers and faculty at the Vernon G. James Center.

A personalized learning experience is offered for high school students from 5 school districts: Beaufort, Martin, Pitt, Tyrrell, and Washington counties.

Summer opportunities, mentors, and internships will be an option for students so that they can gain broad experiences.

If you'd like a school experience where your child will be involved in hands-on learning leading to college and careers, then the Northeast Regional School is for you!

- ▶ Students must apply to be considered for enrollment. Students who will be the first in their family to attend college are strongly encouraged to apply. Students who need extra help to be college ready should also apply.
- ▶ Applications will be available online: [www.NERregionalschool.org](http://www.NERregionalschool.org). They will be posted by January 2013.
- ▶ Students may earn both a high school diploma and up to two years of college credit upon completing the 5-year high school program – **that's two years of college credit free!**

A joint endeavor of North Carolina State University College of Agriculture; the NC State Board of Education; Beaufort, Martin, Pitt, Tyrrell, and Washington school systems; North Carolina Department of Public Instruction, and the NC New Schools Project, with strong support from the NC Biotechnology Center, NC Department of Agriculture and the JOBS Commission.

This project received support from the Golden LEAF Foundation
